SUMMARY

My activity mainly listen jmusic, read jnovel, and writing code. When I develop apps, I create tasks in google keep and break it down so i can make my app progress faster. Sometimes I must make decisions where I must switch technology and create or not the feature . My speciality is web and android mobile

SKILLS

Linux, Git, Kotlin, Java, Js, Cpp, Python, Bash, Sql, Html, Css, Go, Vue, React

EXPERIENCE

Institut Teknologi Telkom Surabaya — Lab Assistant

March 2022 - July 2022

I teach Algorithms and Structure Data in Cpp. and i create automation to recap assignment my student with github
